Hello Parks Commission,

This pertains to the agenda item on July 2, Coyote Creek. We are strongly against this project. It would be very destructive to the Oak Woodlands. These Oak Woodlands are important habitat and carbon sinks. Solar projects should be infill only. It goes against the whole intention of saving our habitable environment to destroy the environment in order to save the environment.

Please do not approve this project, and do not allow future projects which would destroy our natural environment.

Thank you,

April Ford
