

Dear Director Quintero and District Superintendent Bellman,

1,594 Californians sent the following letter to you:

We are extremely concerned to see that on May 9th you granted a CEQA exemption to Sable Offshore to work on the stretch of their failed pipeline that goes through State Parks land — the very same pipeline that already spilled hundreds of thousands of gallons of crude oil on California's beaches, killing hundreds of marine mammals and birds alongside untold numbers of other marine life.

State Parks are for people, not oil pipelines; especially pipelines with a demonstrated history of disaster, run by a company that is blatantly disregarding state laws and running roughshod over California regulations — regulations that are in place to protect our coast, communities, wildlife, and environment from these very projects.

Sable was recently fined a record and maximum \$18 million by the California Coastal Commission for damage caused by unpermitted work. A company with a demonstrated history of acting with impunity should be subjected to the highest regulatory standards — not exempted from them.

We expect the good people at State Parks to be defenders of our precious ecosystems, and require the highest level of regulatory oversight on all potentially risky projects — especially ones that have already spilled and killed.

There is still time for State Parks to do the right thing and require an environmental impact report before you consider whether to approve the easement Sable needs to restart the pipeline within Gaviota State Beach Park.

We urge you to prioritize people over polluting profiteers and ensure that Sable and its corroded "swiss cheese" pipeline are subject to the highest standards that Californians are so proud of.

Please prioritize a full EIR for Sable and this dangerous pipeline.

Signed,

Ed Stanley Sacramento

1,586 Californians sent you the following letter:

We are extremely concerned to see that on May 9th you granted a CEQA exemption to Sable Offshore to work on the stretch of their failed pipeline that goes through State Parks land — the very same pipeline that ruptured 10 years ago, spilling hundreds of thousands of gallons of crude oil on sacred Chumash lands and waters (Santa Barbara's beaches), and killing hundreds of marine mammals and birds alongside untold numbers of other marine organisms.

State Parks are for people, not pipelines; especially pipelines with a demonstrated history of disaster, run by a company that is blatantly disregarding state laws and running roughshod over California regulations — regulations that are in place to protect our coast, communities, wildlife and environment from these very projects.

Sable was recently fined a record and maximum \$18 million by the California Coastal Commission for damage caused by unpermitted work AND two California Superior Court judges recently issued separate court orders halting work on the restart project. A company with a demonstrated history of acting with impunity should be subjected to the highest regulatory standards — not exempted from them.

As we mark the grim 10-year anniversary of the spill and look back on that catastrophic moment, we expect the good people at State Parks to be defenders of our precious ecosystems, and require the highest level of regulatory oversight on all potentially risky projects — especially ones that have already spilled and killed.

There is still time for State Parks to do the right thing and require an environmental impact report before you consider granting the easement Sable needs to begin drilling and spilling again.

We urge you to prioritize people over polluting profiteers and ensure that Sable and its corroded “swiss cheese” pipeline are subject to the highest standards that Californians are so proud of.

Please prioritize a full EIR for Sable and this dangerous pipeline.

Signed,

Carlos Nunez Reseda
